

Erasmus+

Project title: Joint European Degree label in engineering - Toward a European framework for engineering education

Number of project implementation agreement: 101114604

Registration number: 4752

Project completed during the period 11.03.2024. - 15.03.2024.:

***JEDI* final event: towards a joint European Degree Label in engineering**

JEDI (Joint European Degree Label in engineering) comes to an end after a year of collaboration between the *EELISA*, *ENHANCE*, and *EUt+* alliances. To celebrate this milestone, *UPM*, the project coordinator, is organizing a conference on the afternoon of March 14th and the morning of March 15th at the *Escuela Técnica Superior de Ingeniería y Diseño Industrial (ETSIDI)*. During these sessions, the results of *JEDI* will be presented, along with discussions on the feasibility of this initiative, which aims to explore and revise criteria for the application of creating a harmonized European label in joint degrees.

Representatives from the three alliances involved in *JEDI*, as well as members of the European Commission and external stakeholders, will participate in the event to share the challenges associated with developing procedures to create the label in the field of engineering. The focus will be on the academic strategy for its implementation and long-term sustainability in Europe.

The event will take place in a hybrid format, ensuring virtual connection for all sessions. The connection link will be sent to registered attendees once registration is completed.
