

Project title: Better Efficiency for Industrial Sewage Treatment

Number of project implementation agreement: #R054

Registration number: 3315/2017

Project completed during the period 01.10.2018. - 31.10.2018.:

On October 16, in the framework of project BEST - Better Efficiency for Industrial Sewage Treatment #R054, PVS ID 3315 (<https://bestbalticproject.eu>) was organized a student workshop on the practice of water resource management and reduction of environmental pollution caused by industrial wastewater.

The experts from RTU Water Research Laboratory Janis Zviedris and Kristina Tihomirova who are involved in the implementation of the project shared the experience gained by activities within water sector regards monitoring and control of wastewater quality, cooperation between industrial organizations and municipalities and legislation on wastewater management. Also, practical tasks on wastewater management principles and the development of wastewater management plans for various industrial sectors were performed during the seminar. The results and wastewater management plans created by the students were presented at the end of the seminar.

We are thankful to the participants for the active work throughout the whole day!
