

Inga Lyashenko, Doc. of Textile Engineering (Latvia)

Inga Lyashenko, Dr.Sc. is the leading researcher at the Institute of Biomedical Engineering and Nanotechnologies in the Riga Technical University (Riga, Latvia).

She received D.Sc. (2005) in textile engineering of the Riga Technical University, Latvia. She was approved the head of Scientific Research Lab of Biotextile (2008) at the Biomaterials and Biomechanics Institute, Riga Technical University (Riga, Latvia). Scientific Research Lab of Biotextile (2015) was transformed into the Institute of Biomedical Engineering and Nanotechnologies, the Riga Technical University (Riga, Latvia).

Her scientific interests are focused on the structure, properties and calculations of the main basic and combined interlacing, biomedical textile materials and bio- technology.
